

Internet Access for the Boating World

Whether cruising the coastline, out for a day sail, or bringing in the last catch of the day, *CruiseNet* keeps you connected with family, friends, business associates, coworkers, and the rest of the world.

CruiseNet is your own secure, high-speed, wireless network. You can send e-mails, surf the net, check on-line weather, and more... right from your boat. *CruiseNet* gives you high-speed uploads and downloads so you can send photos, music, and other files quickly and easily.

- Send e-mail to friends
- Surf the net for on-line weather, news, and services
- Access remote surveillance and alarm systems¹
- Monitor your boat while you're away¹

Simple to Use

CruiseNet works just like the broadband connection at your home or office. Once installed, just connect your laptop and you are up and running: automatically

connected to the high-speed cellular network. With the wireless Wi-Fi connection option, you can even take your laptop dockside and maintain your high-speed connection.

¹ May require additional hardware.

Fast and Dependable

CruiseNet is fast! It's many times faster than dial-up, and higher Quality of Service than PCMCIA card-based systems that lack the power to maintain adequate connections, particularly in remote locations.

CruiseNet provides the power, speed, and dependability in an integrated solution.

Security for Peace of Mind

Connect a *CruiseNet* CN-2000 to your on-board monitoring systems¹ like bilge pumps, electrical and contact switches, surveillance cameras, so you can monitor them while you're away. *CruiseNet* can even send an SMS alert message to your e-mail or cell phone. Plus, *CruiseNet*'s built-in firewall protects you from hackers, and eavesdroppers. *CruiseNet* keeps you connected while you're on the move and gives you peace of mind when you're away.

No one like Shakespeare... Nothing like *CruiseNet*!

Shakespeare has integrated "best-in-class" cellular modems/routers built to withstand the rigors of the marine environment, and network technology with leading edge EV-DO cellular networks... and of course, highest quality Shakespeare marine cellular antennas.

And, should you ever need it, Shakespeare's unparalleled 24/7 *CruiseNet* support line is always available to help.

Unlimited Access/Low Monthly Fee

With many types of mobile Internet access you must pay by the minute or by the amount of data you send. Not so with the *CruiseNet*. A flat monthly fee provides you unlimited, always-on, high-speed access to the Internet, e-mail and instant messaging.

Airtime Services	Price Per Month
Sprint PowerVison Unlimited Data	\$59.95 (2yr contract)*
Verizon Broadband Access Data	\$59.95 (2yr contract)*
Alltel National Unlimited Data	\$59.95 (2yr contract)*
AT&T Unlimited Broadband Connect	\$59.95 (2yr contract)*

*Some restrictions apply. Prices are subject to change. Please call support for the latest carrier promotions.

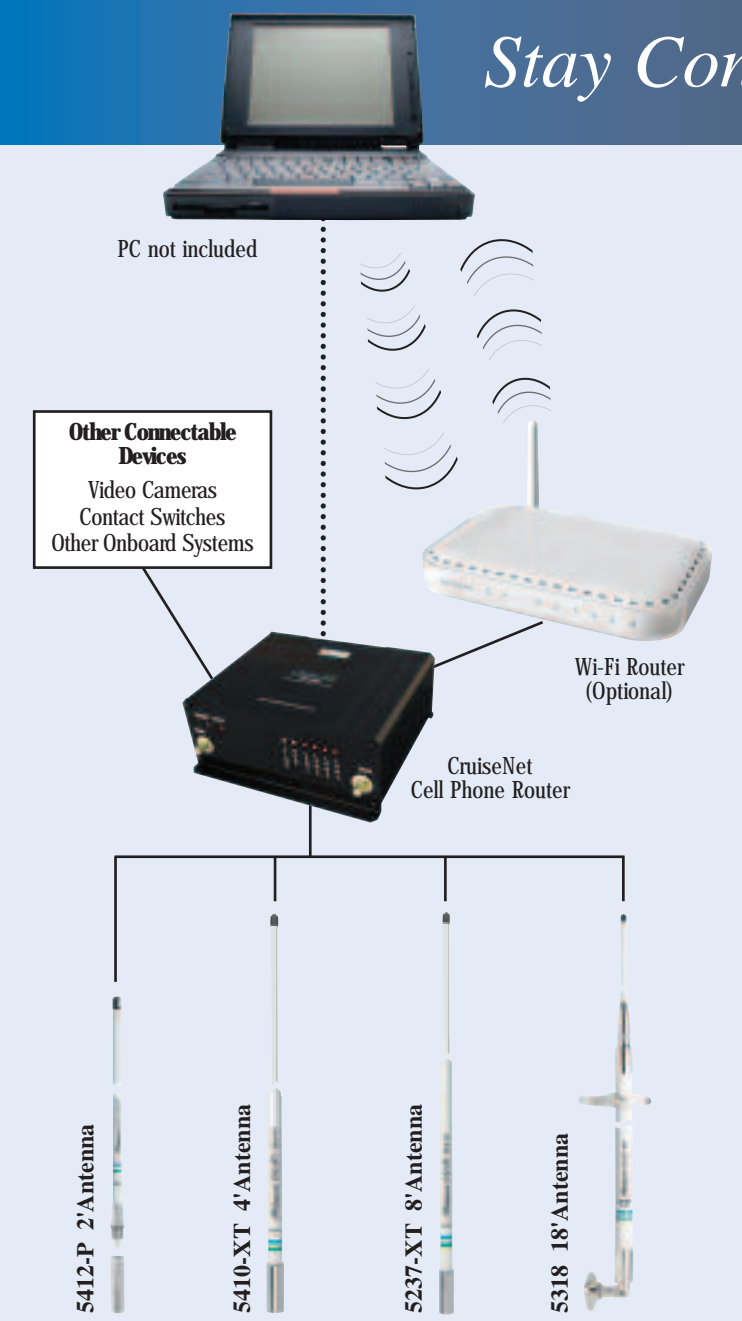

Quick and Easy Installation

CruiseNet can easily be installed in any boat by your marine dealer, or you can even install it yourself. Just install the cellular router and Wi-Fi units (if equipped), mount the antennas, connect to the cellular service, and you're on your way.

Shakespeare®
CruiseNet

Stay Connected with *CruiseNet*!

Tip: For extended range, select from the Shakespeare Galaxy® Series of Dual Band Cellular antennas, ranging from 2' to 18' in length.

For more information on support services that complement Shakespeare's *CruiseNet* System, please see the back panel.

The CruiseNet® Advantage

- **Commercial-Grade** design, construction, and reliability
 - Optimized for high-speed data/Internet connections
 - No need for external booster amplifiers; Maximum allowable output power is built-in
- **Built-in Router** supports Multiple PC users and devices such as security systems, video cameras, etc.¹
- **Two Optional Wi-Fi Router** available for wireless support of multiple users
- **Easily connects** to external antenna(s) for increased range and performance
- **Portable**; easily movable between vessels, vehicles, or land locations
- **Does not tie up PC** resources like PC cards
- **Always-on**, independent of PC
- **Bidirectional Addressability** provides outbound and inbound connectivity from remote PC's, PDA's, and Cell Phones—great for interfacing with yacht monitoring and on-board security systems¹
- **Built-in Contact Switch Monitoring System** sends alarms to PC, PDA or cell phone (CN-2000 only)
- **Built-in Firewall** (CN-2000 only)
- **Free, one-year subscription** to CruiseNet's exclusive "Full Throttle" web accelerator software

¹ May require additional hardware.

Available CruiseNet® Systems

All CruiseNet Systems include:

- Installation/activation instructions, quick-start guide, and user manual
- Annual Subscription to Shakespeare's *Full-Throttle* Web Accelerator
- 120 volt AC power adapter
- 12 volt DC wire harness
- SMA-TNC adapters

All CN-1100 Series also includes:

- One detachable flex antenna for GSM based systems
- Two detachable flex antennas for EV-DO based systems

Model	Network	System Type
CN-1100-A	AT&T	UMTS
CN-1100-S	Sprint	EV-DO Rev. A
CN-1100-T	Telus (Canada)	EV-DO Rev. O (Rev. A Pending)
CN-1100-V	Verizon	EV-DO Rev. A

CN-1100 Series Specifications:

- Dimensions 4.6" x 1.4" x 2.5"; Weight 0.7 lbs
- Wireless WAN: EV-DO Rev. A with Fallback to EV-DO Rev. 0 and CDMA 1x
- Host Interfaces: Ethernet 10/100 Mbps RJ-45, RS-232 DB9 DCE (300-230400 baud)
- Operating Temperature Range: -30/+70°C;
- Humidity: 95% RH, non-condensing
- Input Voltage: 9 - 28V DC;
- Power Consumption @12V DC: Transmit / Receive (typical / max): 239/270 mA, Idle:104 mA, Dormant: 85 mA

CN-2000 System for Sprint includes:

- Built-in Four-port EVDO cellular router
- Two Detachable flex antennas

CN-2000 Specifications:

- Dimensions: 5.275"L x 5.225"W x 2.08"H; Weight: 12oz.
- Wireless WAN: EV-DO Rev. A with Fallback to EV-DO Rev. 0 and CDMA 1x
- LAN: Four-Port Ethernet; RJ45; 10 or 100 base T - Auto polarity sensing
- Operating Temperature Range: -20C to +70C;
- Humidity: 90% non-condensing
- Input Power: 9-18VDC +/-10%
