

The Sea Vision SV 20 model is our standard xenon light with a 35 watt HID xenon lamp and 12 or 24 volt ballast. This light is suitable for small boats wanting to utilize 12 or 24 volt DC power and can be installed on sport fishers, center

consoles, cruisers and performance boats. The vessel must be hauled out for installation although lamp change and any maintenance can be done in the water from within the hull.

## SV20 technical specifications

Application for:	GRP/fiberglass/wood hulls
Lamp:	35 watt HID xenon
Life length:	approx. 3,000 hours plus
Lumens:	3,600
Kelvin colour temp:	5100
Glass lens:	Borosilicate glass
Thickness:	9.5mm / 0.38"
Power supply:	12 VDC start up current max. 18 amps, 3.5 amps continuous 24 VDC start up current max. 8 amps, 1.8 amps continuous
Casing material:	Marine Bronze
Dimensions:	80 mm (3.15") x 128mm (5.04")
Angles available:	Flush
Weight:	2.2Kg/5.9lbs

Code:	SV20
Ballast:	12 VDC / 24 VDC attached with a 425mm/17" cable. This cable cannot be spliced into.
Dimensions:	Length: 89mm/3.5" Width: 125mm/4.92" Depth: 42.5mm/1.67"
Total shipping weight:	1.9 Kg / 5 lbs
Installation:	Recommended at least 6" (152 mm) below waterline between 3 - 6 feet (1 - 2 meters) apart. (60mm) 2.36" cut out hole
Optional lamp:	35 watt HID xenon with 10000 Kelvin color temperature
